

2018 Service Benefit Plan Specialty Drug List

If you are a member or health care provider and have questions, please call 1-888-346-3731, or visit feplblue.org/pharmacy.

Specialty drugs are prescribed to treat people with complex conditions such as multiple sclerosis, hemophilia, hepatitis C and rheumatoid arthritis. These high cost drugs also have one or more of the following traits: they are injected or infused (but some may be taken by mouth); they have unique storage or shipment needs; more education and support is needed to help patients use the drugs properly, and they are usually not stocked at retail pharmacies.

This list of specialty drugs is updated and is subject to change. Changes may appear prior to their effective date. For drug-specific coverage information, please call the number listed above Monday-Friday from 7 a.m. to 9 p.m., or Saturday/Sunday from 8 a.m. to 6:30 p.m. ET.

Please Note: The self-injectable formulation of the drugs with an asterisk are only covered under the pharmacy benefit.

2018 Limited Distribution Drug List

Limited Distribution Drugs (LDD): In some cases, a manufacturer may limit the number of pharmacies it allows to carry (or distribute) a Limited Distribution Drug. Or sometimes a condition of the Food and Drug Administration's (FDA) drug approval process may require a drug to be in the LDD category.

Limited distribution helps the manufacturer carefully keep track of drugs that have special dosing or lab monitoring requirements, or that need to be followed very closely to ensure that any risks that are associated with the LDD are minimized.

You may get the Limited Distribution Drugs listed below through a specific Preferred retail pharmacy with the Specialty Drug Pharmacy Program copayments under the Standard Option and Basic Option. Please contact the Specialty Pharmacy Program at 1-888-346-3731 for assistance with finding the appropriate pharmacy.
